ELECTION OF SPECIES

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The claims encompass vasodilators and their use in monitoring a change in a hemodynamic parameter. Vasodilation affects various relationships such as that between mean arterial pressure, cardiac output, and total peripheral resistance (TPR). Vasodilators fall within three major classes including calcium channel blockers, cAMP mediated compounds, and cGMP mediated compounds. Possible endogenous vasodilators include EDHF, interstitial potassium, nitric oxide, beta-2 adrenergic agonists, histamine, prostacyclin, Prostaglandin D2, Prostaglandin E2, VIP, adenosine, arginine, bradykinin, Substance P, niacin, platelet activating factor, carbon dioxide, and interstitial lactic acid. Possible exogenous vasodilators include alpha blockers, amyl nitrite, atrial natriuretic peptide, ethanol, histamine inducers, nitric oxide inducers, tetrahydrocannabinol, theobromine, papaverine, and so forth. Thus, the various vasodilators are structurally distinct from one another, but have different modes of operation as well.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Note: Applicant is respectfully requested to elect a single disclosed species for examination. The elected species should include a vasodilator as well the hemodynamic parameter of interest that is being monitored and the area of interest. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to distinct species as listed above. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the species are structurally and physically distinct from one another and have different modes of operations.

3. Due to the complexity of the restriction requirement, a telephone call was not made to request an oral election to the above restriction requirement. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. L. Jones whose telephone number is (571) 272-0617. The examiner can normally be reached on Mon.-Fri., 6:45 a.m. - 3:15 p.m..
